LG G2 Mini

Simple, yet Smart

Inspired by the processing power of LG's flagship G2 Smartphones, but designed with your lifestyle in mind, the G2 mini is simple yet powerful. It is reliable, but made to suit an active day. Features like the LG-exclusive Rear-Key complement the sleek design by eliminating the clutter of front and side buttons, while also allowing you to turn the camera on with a single finger press, to capture those moments of your life that would otherwise be lost.

- 4.7" IPS Display with the greatest screen ratio of 71.0% among its class
- Largest battery capacity of 2,440mAh for long-lasting use
- 1.2GHz / 1.7GHz Quad-Core Processor
- 8MP / 13MP rear camera

B2B

From mobile phones with enhanced technology for the smoothest multimedia experience, to ground-breaking hardware design, to entry level mobile devices, LG has a device to fit your needs. Your search for the best in mobiles for business ends with LG.

Boundless possibilities. Trust LG.

LG B2B brochure

Find out how businesses can be more productive, secure and in control using LG Technology by downloading our free “LG Business Guide” brochure.

DOWNLOAD

All productivity

Increasing productivity is central to LG’s ethos and LG devices offer a host of unique features. These allow you to work creatively and efficiently so you can be the most productive you can be. This comes from the freedom to work from where you want, when you want. LG uses Android, the world’s, most popular open source operating system and the most innovative.

Productivity possibilities are endless with LG.

All High Tech

Stretching the possibilities of technology and your mind is LG’s goal. As a leader in mobile phone design, LG burn a trail for others to follow. The full HD LG G Flex is the world’s first smartphone that is curved both inside and out with a gently arched display and battery. Using the latest and most advanced display technology – Plastic OLED – the LG G Flex is less than 1mm thick and uses self-luminous organic materials.

Hardware possibilities are stretched with LG.

All Business

Bring Your Own Device (BYOD) is an increasingly important part of the enterprise ecosystem, escalating employee productivity through their own choice in technology. But it also brings complications in terms of mobile device management, applications, device and systems integration and heightened security risks.

LG has worked to help corporates manage a large and varied number of devices, efficiently, securely and cost consciously. Businesses can manage configuration, and centrally control features and policies.

Possibilities can be seized with LG.

All Safe

A major challenge for companies today in developing the mobile office is ensuring proper management and security of company data in a well supported environment while providing convenience and privacy to the user.

LG’s advanced Enterprise Solution gives a secure VPN solution to US Government security Standard (FIPS 140-2). LG has enhanced the Android Device Policy Mnager to offer extended control of the deivce enabling enterprises to wipe all data or lock the device remotely. LG also secures data sharing amongst colleagues to offer a tailored, secure corporate operating system that looks and behaves the same regardless of the device used.

Securing all your possibilities with LG.

LG AND GOOGLE INTRODUCE GOOGLE NEXUS 5

Google Nexus 5. The smart, new phone made to capture the moments that matter.

nexus5

www.lg.com/uk/nexus5

LONDON, UK, 31st November 2013 — Following the success of Nexus 4, LG and Google have partnered again to deliver the first smartphone featuring the latest Android operating system, Android™ 4.4, KitKat®. Packed with new features, Nexus 5 is the slimmest and fastest Google Nexus phone to date. With a stunning 5-inch Full HD IPS display, Nexus 5 boasts an expansive screen for an unrivaled visual experience. The lightweight smartphone comes in both 16GB and 32GB versions and is the perfect combination of powerful performance, functionality and convenience thanks to LG's proven hardware and best of Google software and services. "LG is...**Read more**
